

# Ryan Padraig Kelly Northern Ireland

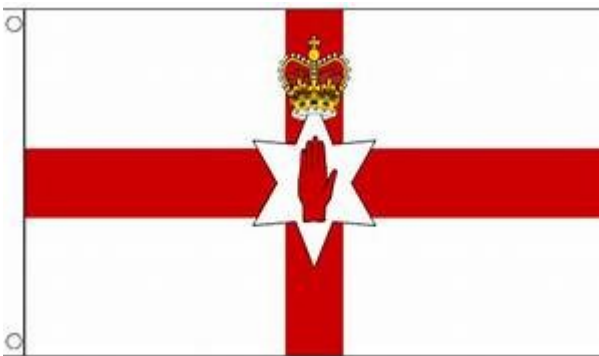

**How the Northern Ireland Protocol Works**

The map illustrates the Northern Ireland Protocol. It shows Great Britain (green), Northern Ireland (light green), and Ireland (orange). The Atlantic Ocean is to the west, and the Irish Sea is to the south. Two arrows indicate the flow of goods and people: Arrow A points from Great Britain to Northern Ireland, and Arrow B points from Northern Ireland to Ireland. A legend on the left explains the arrows: (A) Goods coming from the rest of the UK are checked at Northern Ireland's ports, and (B) Goods and people cross freely from Northern Ireland to the Republic of Ireland.

(A) Goods coming from the rest of the UK are checked at Northern Ireland's ports.

(B) Goods and people cross freely from Northern Ireland to the Republic of Ireland.
